- Experimental format : student-initiated question/answer mode, 'modular topics' all connected by the Spidey Web 😊 of Superstring Duality

- Vast area of past, current & future research...
- Raised basic ideas intended as entry points to literature. See also my TASI-99 and PITP-02 lecture notes;
- Polchinski on spinor representations, duality, compactification on Calabi-Yau manifolds;
- Gubser's review on CY & G_2 & fluxes, etc; ...
